CK-PAD HARDWARE-BASED INTERACTIVE DISPLAY SYSTEM

CK-PAD HARDWARE-BASED INTERACTIVE DISPLAY SYSTEM can not only write or draw, it can also accept multiple external signals and realize information display, share and annotation; By using third-party application, it can realize teleconferencing online; When integrated into other system, it helps to realize interactive functions such as touch control and signal annotation.

APPLICATION HERE:

- Education & Training
- Meeting and Presentation
- Command and Control Center

Unique Hardware-based Interactive Display System

All-in-one Solution Design

● No need for software

The annotation feature is built-in, and users are able to make notes on any external sources such as PC, Visulizer, AV inputs.

● No need for training

CK-PAD is designed with flat menu and icons, Our touch screens are well-known for their ease-of-use and you can write naturally on the touch screen.

● No need for maintenance

CK-PAD adheres to the highest attainable international certification standards. All sizes of LCD screen panels are quality guaranteed to last for 50000 hours.

Simple Touch Screen Operation

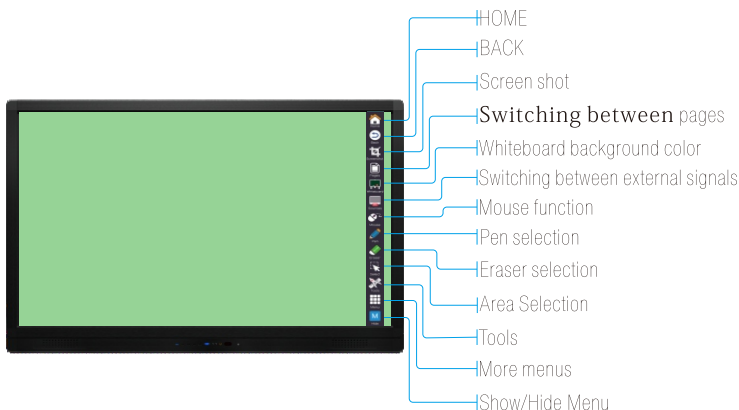

● Single Button

Pressing the button to turn on or off the CKPAD or mini PC(if in-built).

● Touch-Operated Onscreen Display

Pressing the Menu icon displays an onscreen menu bar that lets you easily switch input sources, change volume level, back light and color parameters.

3 NO NEED
CHARACTERISTICS

Simultaneous Annotation

Recognizing up to 10 points of touch, the CK-PAD display system allows up to 10 fingers or pens to touch on the screen at the same time. Participants can take an active part in meetings, brainstorming sessions, meeting room interaction and more.

A Wealth of I/O Terminals

The CK-PAD comes with a wealth of input/output terminals-on the front panel and the side of the touch screen-to enable easy connection with a wide variety of external equipments. This array of terminals includes two HDMI ports, 2 VGA ports, one S-Video port, one AV port, one RF TV port, one YPbPr port and one AV output.

● FRONT PANEL

● RIGHT PANEL

● BOTTOM PANEL

Smart CK-PAD Knows You Better

Smart Source Switching

When there is a new signal source connected to CK-PAD, it will immediately detect and switch to the new source intelligently. When the source is dis-connected, CK-PAD will switch back to the previous source.

● The current display signal is AV

● When laptop is connected, the CK-PAD will switch to laptop signal automatically

Smart Gesture

Writing and erasing can be simply realized by touch or gesture. Smart gesture includes single click, double click and right click etc..

● Single finger move
=Writing

● Single finger click
=Left mouse function

● Single finger long-press
=Right mouse function

● Single finger double click
=Left mouse double click

● Two fingers move
=Partial erase

● 2 fingers or more promptly move
from top to bottom
=Erase all

● Two finger long-press
=Move the menu location

● 3 fingers or more holding on the
screen for 1 second
=Move the annotation

Notes:

This function is available only when the Smart Gesture function of system setting is On.

Smart Brightness

When the user is writing, the system will adjust the backlight to protect user's eyes.

Normal brightness

Brightness decrease when writing

Smart Recognize

CKPAD features a handwriting recognition function for converting selected on screen handwriting into standard text and the handwriting is editable and scalable.

This convenient function allows you to utilize onscreen content to make neat and legible minutes of your meetings.
