

PHIBONACCI Learning
K-12 STEM

True Hyper-Interactive 3D for the modern classroom

Visualize · Interact · Understand

Unleash the Learning Revolution

Phibonacci blends neuroscience and technology to makes abstract STEM concepts visible and hands-on. Students don't just watch a video – they explore, manipulate and experiment with 3D simulations, building real conceptual clarity. Available through EIS, your authorised AV distributor.

The Phibonacci Edge

Experiential & immersive Learning

Learn by doing, without the fear of being wrong.

Empowering educators

Lesson plans, annotations and in-class activities built for teachers.

Multi-language support

Content that reaches students in the language they learn best.

2500+ simulations

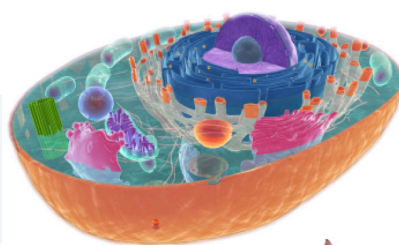

A rich library of hyper-interactive 3D simulations.

Enhanced Conceptual clarity

Abstract ideas become visual, tangible and memorable.

NEP 2020 aligned

STEM mapped to major curriculums for grades 6-12.

3D Learning for Every Learner.

uniPhiEd solutions for classrooms and home learning

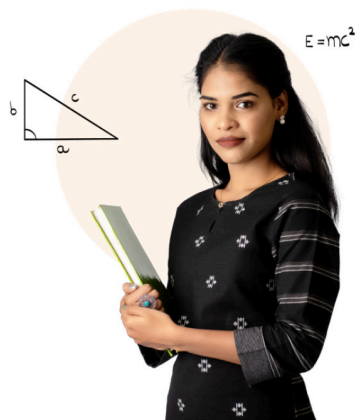

FOR CLASSROOMS

uniPhi myClass

Technology that empowers teachers

- ✓ Saves up to 75% of classroom time; classes up to 80% more engaged
- ✓ STEM content aligned with major world curriculums, rich 3D visuals
- ✓ Pre-built lesson plans, annotations and in-class activities
- ✓ Learn by doing: experiment without the fear of being wrong
- ✓ TrEKS Program: knowledge-sharing and training for educators
- ✓ Complete solution for the full duration of a class

FOR HOME LEARNING

uniPhi myStudy

Personalized Adaptive Learning (PAL)

- ✓ AI-powered learning journey with personalized assessments and revisions
- ✓ Up to 75% more memory retention by learning by doing
- ✓ 3D simulations, recorded lectures, teacher notes and announcements
- ✓ Question banks and in-simulation pop-up quizzes
- ✓ Powerful analytics to track the learning journey
- ✓ Works on phones, tablets, laptops and computers
